

Flower Robotics Seminar

Development of Home Robots — Concept & Example —

Date & Hour: July 1st 12:00–14:00 and July 2nd, 14:00–16:00

Room: Seminar Room 6/7 (level +2, Congress Center Leipzig)

Abstract:

The seminar lectures key points to utilize robots at home by showing examples of application of Patin, the home robot platform provided and developed by Flower Robotics. The lecture will show:

- Why robot design (outer appearance) is so important for acceptance by end-user and success in market.
- Key aspects to be considered in the (outer) robot design and appearance.

The lecture also include results of several demonstration experiments.

(All RoboCuppers are invited to this seminar.)
