Exhibition profile

As leading European exhibition for the preservation of monuments, restoration and refurbishment of old buildings, the denkmal focusses its activities around the preservation and protection of the cultural heritage.

If you are looking for excellent contacts and international presentations in the fields of preservation of monuments and restoration, there has been no better address than the Leipzig-based denkmal since 1994.

The exhibition provides an indispensable business and information platform for everyone involved in this sector and promotes the exchange of opinions and experience across borders.

The success of the denkmal is based on the first-class combination of the exhibitors' presentations, practical demonstrations and an ambitious, top-quality specialist program. The exhibition takes place under the patronage of the UNESCO which further underlines the event's international significance.

The denkmal is the meeting place for the specialist crafts, restorers, preservers of monuments, architects, private & municipal clients, church institutions, private persons interested in this subject as well as art and culture lovers.

The denkmal will again be held in 2018 together with the MUTEK - International Specialist Trade Fair for Museum and Exhibition Technology – and the Lehmbau specialist exhibition.

Together, the denkmal and the MUTEK provide the international industry platform for preserving the cultural heritage and for the dissemination of knowledge thereof.
