Veranstaltungsprofil

As the only dedicated trade fair and accompanying congress for therapy, medical rehabilitation and prevention in Germany, therapie Leipzig offers a complete overview of the market. Altogether, 16,100 physiotherapists, occupational and speech therapists, doctors, sports therapists and sports scientists met up in Leipzig in 2017 in order to acquaint themselves with new approaches to therapy and current trends in the sector and to deepen their knowledge in already familiar areas. Some 3,100 participants took advantage of the opportunities for further training and professional development offered by more than 200 symposia, seminars and workshops. Essential hallmarks of the congress programme are interdisciplinarity of approach, evidence and practical orientation. The programme is devised with the help and support of more than 20 professional associations and scientific institutions.
