- Facilities, equipment and building services technology

### Event Profile

The E/D/E „Meeting Place for the Sector“ has been held biennially at Leipzig Fair and Exhibition Centre since 2006 and brings together almost all segments represented by E/D/E. First and second tier decision makers from E/D/E member companies, contract suppliers and cooperation partners from the fields of tools, plant and equipment, building equipment, fasten technology, building hardware, building components, house technology, welding technology, occupational safety, technical retail business and building-services technology use the event as a communication platform. At the same time, it represents an excellent opportunity to

present new products, to conduct business and take orders. In 2012, the event introduced a new concept when trainees from the hardware retail trade were included for the first time and given the chance to experience business activities at the 'Meeting Place' in Leipzig at first hand. With more than 2,000 attendees, the last event in 2012 exceeded all the organiser's expectations.
