

Organisers

- Leipziger Messe GmbH

Supporting Organisations

- Trade associations of the electrical trade from Saxony, Thuringia and Saxony-Anhalt

Dates

- 16 – 18.10.2013

Results 2011

- Exhibitors: 219
- Visitors: 19,200
- Industry attendees: 96%
- Gross floor space: 20,500 m²

Product Segments

- Building installation technology and building systems engineering
- Lighting
- Heating systems, air conditioning technology, ventilation
- Power engineering
- Automation technology
- Transmitting and receiving technology, broad-band technology, broad-band distribution technology
- Information and communication technology, office equipment
- Protective and safety systems
- Measuring instruments and test equipment, metrology, sensors
- Components, modular assemblies, transformers, drive systems
- Tools and equipment for operations, storage and assembly
- Facility management
- Services
- Initial and advanced training

Event Profile

The efa trade fair for building systems, electrical engineering, air conditioning and automation is the most important electrical installation industry convention for Central Germany and the surrounding regions. The fair is a meeting point for experts from the worlds of industry, crafts, commercial trade, the energy sector, architecture, planning, engineering, construction and service provision.

Taken together with SHKG – trade fair for the sanitary, heating, air-conditioning and building services automation sectors – the two fairs present the entire bandwidth of energy-efficient and sustainable building services technology at the same time in Leipzig. Central to concerns at the trade fair are innovative and energy-efficient technologies which help conserve natural resources. Alongside the products and services offered by exhibitors, efa provides, in the efaforum and other specialist events, the latest information for both experienced professionals and newcomers to the sector.

For the first time, the established combination of efa and SHKG will be supplemented by HIVOLTEC – 3rd International Trade Fair for High and Medium Voltage Technology – from 16 to 17 October 2013.
