

Trade Fair for High and Medium Voltage

Organisers

- Leipziger Messe GmbH

Technical Consultant

- Ingenieur-Büro Dieter Hetzel

Dates

- 28 – 30.10.2015

Product Segments

- Electrical and energy technology
- Control technology and automation
- Measuring technology
- Occupational and fire protection
- Transport and construction
- Services
- Research and development

Event Profile

Germany's only special trade fair for users of extra-high, high and medium voltage technology, HIVOLTEC spotlights current developments relating to network expansion and the integration of decentralised energy-generation plant.

For engineers, technicians, master craftsmen and electrical fitters from network and power-station operators and companies, as well as the electrical installation trade, the trade fair represents a platform for practical technical solutions relating to the setting-up and operation of electrical energy and plant technology from 1,000 V AC and 1,500 V DC.

For exhibitors, HIVOLTEC is a cost and time efficient platform for making direct contact to users. Moreover, exhibitors and trade visitors can find out about the latest developments in the sector from the accompanying lectures.

HIVOLTEC is held concurrently with two other trade fairs: efa – trade fair for building systems, electrical engineering, air conditioning and automation – and SHKG – trade fair for the sanitary, heating, air-conditioning and building services automation sectors – both of which will take place from 16 to 18 October 2013.
